TMS PETROSMART EZ PAY-AT THE-PUMP SYSTEMS

CONTROL: Gilbarco   TOKHEIM   DRESSER Wayne

CARD READER EQUIPPED PUMPS AND DISPENSERS

EZ 8/16 Control System, Pay at The Pump sites

The EZ controller is the latest in a long line of simple and easy to use pump controllers, designed for rugged operation with the latest technology, and is an inexpensive alternative to other full-blown POS systems. Two models are available: the EZ-8 (for up to 8 fueling positions), and the EZ-16 (for up to 16 positions. Many of today's convenience store operators are incorporating more than just fuel and groceries at their stores. Finding an easy to use POS that suits their needs in a restaurant or grill, that also provides pay at the pump, is difficult at best. If a store has recently remodeled and added a tailored POS customized to a store's needs, then decided to upgrade to pay-at the-pump, the choice is clear. Call TMS... Since our system is doesn't include the cash register functions, the storeowner is free to choose from the most simple of registers, to a more complex POS tailored to his specific needs. An added benefit to our systems is that the cash register, pump control, and credit card functions are not all in one integrated unit… The store is not "dead in the water" if one of the systems goes down. Our product combines a TMS PetroSmart EZ controller, providing control of electronic pumps and dispensers with or without inboard card readers, with a countertop Hypercom credit card terminal, providing card processing for all in store purchases. The storeowner chooses the best POS for his store The PetroSmart EZ connects directly to dispensers equipped with card readers via our EZ IC Boxes. All that's needed is a cash register, a phone line and a card-reader dispenser. The EZ provides pump control and pricing, maintains shift history, and the PetroSmart payment terminal completes all inside non-gas, and outside credit transactions as well acting as the EZ console's printer. **Currently the PetroSmart-EZ control system processes the following cards at Non-Branded or Independent Sites through two networks: ADS Chicago, or RBS LYNK (Atlanta).**

Cards accepted by the PetroSmart EZ Hypercom credit card terminal:

- Visa
- MasterCard
- AMEX
- Discover
- Debit
- Wright Express
- Visa Fleet
- MasterCard Fleet
- Voyager
- Carte Blanche
- EBT

The EZ Pay-at-the-Pump system has all of the features of the Pump-Only version, plus the following:

- Perpetual warranty period with participation in the CircleNet program
- Friendly, Cooperative 24/7 help desk with participation in the CircleNet program
- All operational reports printed through the on board credit card terminal's printer
- Higher reliability with discrete components

Features of the features of the Pump-Only version include:

- Friendly, Cooperative help desk
- Easily understandable operator interface equals quick training
- Self-Service Post-pay, Preset, and Prepaid sales, and Full-Service sales
- Less costly
- Small foot print
- On board modem allows remote downloading of program updates and of site configuration backed-up on floppy or hard disk
- Interfaces with Gilbarco, Tokheim, or Dresser Wayne electronic dispensers, including blender MPDs
- Controls any hose designation (1-8) at each fueling position
- Optional TMS 35 printer made by Citizens prints all operator, manager, accumulating, declining tank balance, and programming setup reports
- Maintains declining tank balances
- Features separate "Pump Select" keys to reduce the number of keystrokes
- Re-settable operator's shift total and manager's total
- Sends prices to electronic dispensers
- Retrieves electronic hose totals from the dispensers

Programming Features

- Self-Service and Full-Service pricing by grade
- Selectable setting for Stacking sales
- Selectable Prepay only sales
- Selectable Auto-Authorize operation
- Auto-Print prints completed transaction receipts automatically
- Selectable grade names for receipts and reports*
- Customized printer receipt headings via the EZ Config software
- Accumulating totals can be initialized to match the mechanical totalizer readings at the pump for convenient tracking
- Manager password keeps accumulating totals and prices and programming secure from unauthorized operators

Reporting Features

- Transaction receipts*
- Accumulating totals (money and volume)
- Dispenser electronic hose totals (money and volume)
- Current shift and three previous shift totals (money and volume)
- Manager's shift totals (money and volume)
- Non-re-settable tank activity totals

TMS can now retain console site configurations on our servers, and provide operating software and configuration downloads over the phone via an internal modem. Contact your local dealer, or call for TMS details.
