REPLACEMENT PARTS

This parts list is the same as the parts list appearing in the Series 1000 Diagnostic Manual, C08925.

The drawings and part lists on the following pages provide an easy reference for identifying Series 1000 parts and their corresponding part numbers. Using the part numbers when ordering will expedite your order and reduce the possibility of the wrong parts being shipped. Multiple views of the system are provided to ensure all parts are identified.

An asterisk (*) in front of a part number denotes that part is a sub-part of the preceding part without an asterisk. Consecutive part numbers with asterisks are all sub-parts of the first preceding part without an asterisk.

Example:

|		
5.	C05724	Cable Assy., Emergency Stop
6.	*C08600	Switch Operator, Push-Pull, Red
7.	*C08601	Switch, Contact Block, 1NO,-1NC

In the example, parts 6 and 7 are a sub-part of part 5. If part 5 was ordered, parts 6 and 7 would be included. If desired, part 6 or 7 could be ordered separately.

This compilation contains parts spotting drawings and descriptions for the following units:
